INTRO

RIOT NATION

In the digital age, where systems of control and surveillance are being strengthened, Riot Nation emerges as a community united by solidarity and determined to subvert the status quo. Conceived as a digital city, Riot Nation hosts diverse services created by and for our community, where mutual aid is our primary tool.

We believe in the power of knowledge and technology to transform reality, breaking down barriers and building a future where freedom and justice are accessible to all. In the face of failing traditional politics and indifferent, corrupt governments, solidarity becomes our only mechanism for survival and resistance.

This manifesto is our declaration of principles and our commitment to a more equitable and free world.

PRINCIPLES

I. Freedom & Digital Autonomy: We oppose any form of censorship and surveillance. We defend the privacy, security and autonomy of each individual in cyberspace. Our mission is to ensure that information flows freely and that digital tools serve the people, not corporations or oppressive governments.

II. Social & Technological Justice: We fight for a society where technology is a tool of emancipation and not domination. We develop projects that seek to reduce inequalities and empower marginalized communities, ensuring that the benefits of technology reach everyone, regardless of their origin or condition.

III. Sustainability & Ethics in Technology: We promote technological practices that respect the environment and human rights. We are committed to developing and using technologies ethically, always seeking the lowest environmental impact and maximum social benefit.

IV. Collaboration & Mutual Support: Riot Nation is a network of support and collaboration. We believe in the power of community and the strength of collective work. We help each other, sharing knowledge, resources and skills to strengthen our common struggle.

V. Radical & Subversive Innovation: Innovation is our weapon. We are dedicated to create radical solutions that challenge the established system. We hack not only technology but also power structures, building alternatives that promote equity and justice.

VI. Education & Empowerment: Education is fundamental to freedom. We are dedicated to continually teaching and learning, sharing technical and critical knowledge that allows people to understand and control technology. We believe in open and accessible education for all.

VII. Direct Action: Our activism is not limited to the digital space. We develop online projects that have a tangible impact in the real world, improving people's lives and strengthening communities. From apps that facilitate access to basic resources to platforms that promote community organizing, our work has a practical and concrete purpose.
